KARLEIGH'S KORNER

A message from our agronomist

With World Pork Expo just around the corner, I thought I would share:

5 WAYS HOG PRODUCERS CAN MAKE MONEY FROM MANURE!

1. Carbon Credits – Is your manure stored in a lagoon? Did you know that by processing manure through the First Wave system you could get paid cash for carbon credits!

2. Fertilizer – Manure is an incredible fertilizer and in recent years, non-livestock famers are increasingly interested in incorporating manure in their fertilizer plans. As fertilizer prices skyrocket, the value of manure is increasing as well making this the perfect time to sell this liquid gold.

3. Precision Agriculture – You can increase the value of manure even further by processing it into two distinct fertilizer products that can be precisely applied through pivot or drip irrigation systems.

4. RNG Offtake – Did you know that the First Wave concentrates the Volatile Solids in manure to transform it into a super charged feedstock for RNG production!?! The product can be economically transported to a nearby digester in exchange for an offtake payment.

5. Volume Reduction – Process your manure through a PLANT system to reduce overall volume by up to 75%! Recycled clean water can be reused on the farm to reduce groundwater withdrawals.

Eliminating the stress of full lagoons and overflow fines = *Priceless!*

BOOTH V1052

During the 5th month of every year, my aunt lets her pigs out in the field... ...It's May-ham!

BEN & JERRY'S COMMITS TO LOWERING GHG EMISSIONS. . . AND WE'D LIKE TO OFFER A NEW FLAVOR SUGGESTION:

Ben & Jerry's is committing to cut greenhouse gas emissions to half of the industry standard by 2024! That includes putting the cows on a high-quality forage diet and using methane-reducing technology for manure management.

LWR's First Wave and PLANT systems have been found to reduce both direct and indirect greenhouse gas emissions caused by manure by up to 82%! They also reduce indirect emissions from fuel used for manure transportation and spreading by 60%!

Would you serve up a dish of 'No Methane Around'?

Learn how to maximize the value of your manure! Visit **BOOTH V1052** at World Pork Expo in Des Moines or reach out: karleigh.lewis@livestockwaterrecycling.com

JUNE IS FOR DAIRY

June is Dairy Month and we're utterly thrilled! As we usher in June and a full month of celebrating the dairy industry, we are incredibly proud of the sustainability efforts of our clients as they continue to produce the MOST SUSTAINABLE milk on the planet!

Cheers to all of our amazing partners who work so hard to produce delicious and sustainable dairy.

Check out this super easy recipe for Farmers Cheese!

Do you want your spring manure application to look a little different next year?

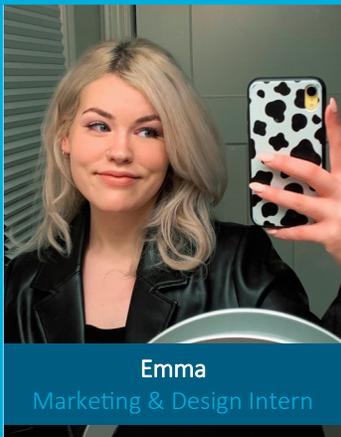

We have some ideas we'd love to share with you!

Give us a call to find out how you can take the pressure off your lagoons and make springtime a little less stressful!

WE'RE ON THE ROAD AGAIN! COME FIND US THIS SUMMER:

- June 1-3: [Inventures, Calgary, Alberta](#)
- June 5-8: [Bluetech Forum, Vancouver, BC](#)
- June 7-9: [Global Energy Show, Calgary, Alberta](#)
- June 8-10: [World Pork Expo, Des Moines, Iowa](#)
- June 15-16: [World Biogas Expo, United Kingdom](#)
- June 21-23: [Canada's Farm Show, Saskatchewan](#)
- June 21: [McKinsey's Early-Stage Investor Conference, Virtual](#)
- June 21-23: [CETA Business Forum, Virtual](#)
- July 13-14: [North American Manure Expo, Pennsylvania](#)
- July 19-21: [Ag in Motion, Saskatchewan](#)
- July 24-28: [31st PNWER Annual Summit, Calgary, AB](#)

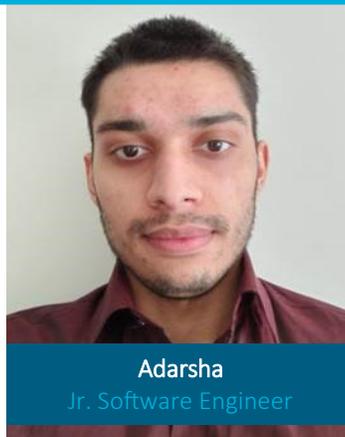

INTRODUCING OUR FUTURE MANURE EXPERTS — WELCOME TO THE TEAM!
