

Company Profile

Livestock Water Recycling is the innovator of the award-winning PLANT. This patented technology platform provides hog, dairy, anaerobic digester, and food processing operations the ability to recycle clean water and fertilizers from nutrient laden liquids. LWR's approach to manure treatment achieves triple-bottom-line outcomes: meeting the growing demand for food, increasing farmer profitability, and protecting the environment and public health. LWR's fertilizer PLANTs save farmers time and money by providing them with a cost-effective solution to manage manure and bioliquids in a sustainable manner. LWR has systems operating throughout Canada, the US, the Middle East, and the United Kingdom.

In 2020, LWR CEO was named one of the six most influential women in Canadian Agriculture for her vision of Lagoon free protein production and was selected to join Google's first Google for Startups Accelerator for Women Founders. Most recently, LWR made the FoodTech 500 as the highest ranking Canadian agrifoodtech company, claiming the 31st spot. Now focused on digitizing manure, LWR launched LOIS: the first ever Machine Learning application for manure. LOIS helps producers make informed decisions to access digital marketplaces including fertilizer sales, nutrient trading, carbon credits and the rapidly expanding biogas sector. LOIS was selected as a Top 10 new product at this year's World Ag Expo in Tulare California.
